Anh Dao

anh.d.dao@aalto.fi | +358 41 325 1677 | daoa0601.github.io

Education

M.Sc. in Computer Science — Aalto University, Finland | *Aug 2024 – Present*
GPA: 4.65/5.00

B.A. in Computer Science — Grinnell College, USA | *Aug 2019 – May 2023*
GPA: 3.76/4.00

Experience

Smartly – Finland — *Feb 2026 – Present*
Launchpad Engineer (Python/TypeScript)
- Developing adtech features for Meta Ad platform channel; contributing to agentic orchestration efforts

Nokia Solutions & Networks – Finland — *Aug 2025 – Jan 2026*
R&D Trainee (Python/React/GCP)
- Developed agentic internal solutions and RAG pipelines for document processing (Python, React, GCP, Vertex AI)
- Built LLM-powered tools automating 40% of manual data processing workflows for the 4LS team

Aalto University – Finland — *Jan 2026 – Present*
Master Thesis Worker
- Adversarial attacks on VR cybersickness classifiers – feature-constrained gradient attacks on sensor-based LSTM models with confidence-triggered fallback defense

Aalto University – Finland — *Aug 2024 – 2025*
Teaching Assistant (Python/Docker/Kubernetes)
- Supporting 5 Master-level courses (>300 students); developed autograders and containerized lab environments

Microsec Zrt. – Budapest, Hungary — *Jun – Aug 2022*
Software Engineer Trainee (Go)
- Developed PKI certificate linter in Go; implemented X.509 extension parsing following RFC5280 standards

Grinnell College – DASIL – USA — *Aug 2022 – May 2023*
Research Assistant (R/Python)
- Built multivariate statistical models in R/Python for Stat2Labs, used by 1000+ students across 5 institutions

Projects

Scalable Agentic Systems Evaluation (Python/LiteLLM/SLURM) — *Jan – Apr 2026*
- Benchmarked Agentless, SWE-Agent, and OpenHands harnesses on SWE-bench across 6+ open-source LLMs (Qwen3, Gemma-3, Mixtral) on CSC's LUMI supercomputer (AMD MI250X, ROCm)
- Found harness design alone shifts benchmark scores by 53 percentage points; serving correctness is binary with no graceful degradation

Music Artist Network Analytics (Python/NetworkX) — *Feb 2026 – Present*
- Built collaboration network analysis pipeline for 441 Finnish hip-hop artists across 5,037 tracks using MusixMatch API
- Implemented phonetic rhyme analysis (Raplysaattori), community detection, and temporal link prediction on artist graphs

Skills

Languages: Python, C/C++, CUDA, Java, Go, R, JavaScript/TypeScript, SQL

ML/Systems: PyTorch, scikit-learn, NumPy, pandas, vLLM, SLURM, NetworkX, Docker, Kubernetes, GCP, Vertex AI
